Professional Summary

Highly skilled and results-driven Web Application Developer with over 5 years of experience in designing, developing, and deploying scalable web applications using ReactJS, Redux, and NodeJS. Adept at collaborating with cross-functional teams to deliver innovative, user-centric solutions. Strong expertise in front-end architecture, performance optimization, and responsive design. Recently expanded skills into full-stack MERN development including Node.js, Express.js, MongoDB, and Tailwind CSS. Recognized for delivering high-quality code, mentoring peers, and driving continuous improvement in development processes.

Technical Skills

- Languages: JavaScript (ES6+), HTML5, CSS3, TypeScript
- Frameworks & Libraries: ReactJS, Redux, Redux Toolkit, Context API, Express.js
- Backend & Database: Node.js, MongoDB
- Styling: Tailwind CSS, Bootstrap
- Build Tools: Webpack, Babel, NPM
- UI Libraries: Syncfusion, Storybook
- Version Control: Git
- Development Tools: Visual Studio Code
- Monitoring & Analytics: Kibana, Quantum Metrics, Jenkins

Professional Experience

IT Analyst | August 2025 – Present

Tata Consultancy Services

- Developed and enhanced online and offline retail store purchase websites using React.js, delivering seamless customer experiences across multiple channels.
- Worked on critical e-commerce modules including Order Review, Customer Disclosure, Payment, Terms & Conditions, and Order Confirmation pages.
- Developed a checkout reply option on the dot-com page, enabling representatives to view customer experiences as video recordings.
- Designed technical solutions by optimizing complexity, ensuring scalability, and making systems more adaptable for future enhancements.
- Implemented and worked on the Cobrowse concept leveraging RabbitMQ, enabling real-time collaborative browsing and customer support.
- Utilized Redux-Saga for robust state management, ensuring predictable workflows and improved application performance.
- Refactored and optimized API calls in RabbitMQ, improving efficiency, scalability, and maintainability of messaging workflows.
- Monitored Kibana logs and Quantum Metrics in production to proactively identify issues, track user behavior, and ensure system reliability.
- Led a small team by assigning tasks, guiding development efforts, and ensuring timely delivery of project milestones.

Senior Engineer | December 2020 – July 2025

Aspire Systems Pvt. Ltd., Chennai

- Developed and maintained loan portal web applications using ReactJS and Redux.
- Collaborated with UI/UX designers and backend developers to ensure seamless integration and user experience.
- Implemented reusable components and optimized rendering performance for large-scale applications.
- Conducted code reviews, mentored junior developers, and enforced best coding practices.
- Worked closely with QA teams to identify, debug, and resolve issues efficiently.
- Managed deployments across development and QA environments.
- Integrated third-party APIs and libraries to enhance functionality.

Projects

Task Management App | [React.js](#) | [Node.js](#) | [Express.js](#) | [MongoDB](#) | [Tailwind CSS](#)

[Frontend](#) | [Backend](#) | [Live Demo](#)

- Built a full-stack collaborative task management application with CRUD operations for tasks including title, description, deadline, priority, and status.
- Implemented task assignment, deadline tracking, and priority-based sorting to help teams manage workloads efficiently.
- Developed collaboration features including task sharing with permission controls (view/edit), threaded comments, and file attachments.
- Integrated email notifications for task updates, approaching deadlines, and status changes using Node.js.
- Designed RESTful APIs with Express.js and stored data in MongoDB; built responsive UI with React.js and Tailwind CSS.

Password Reset Flow | [React.js](#) | [Node.js](#) | [Express.js](#) | [MongoDB](#) | [Bootstrap](#)

[Frontend](#) | [Backend](#) | [Live Demo](#)

- Implemented a secure password reset flow with email verification for a full-stack web application.
- Designed a forgot password page where users enter their email; backend validates the user in MongoDB and sends a unique reset link.
- Generated and stored a random token in MongoDB; verified the token on the reset page and updated the new password securely.
- Built frontend with React.js and Bootstrap; backend API developed with Node.js and Express.js.

Certifications

Full Stack Development (MERN) — GUVI | 2026

Covered: Node.js, Express.js, MongoDB, React.js, Tailwind CSS

Achievements

- Received appreciation from the Client and internal team for good quality of work and performance.
- Received Rolestar Award.

Education

Bachelor of Engineering in Computer Science — Jerusalem College of Engineering, Chennai, TN | 82%
